U.S. Patent and Trademark Office PTO-326 (Rev. 11/00) Art Unit: 3764

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-2 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Prokop.

Prokop discloses in figures 1-2 a therapeutic support pad 10 comprising a pliable and elastic elongated core 50 (the core is a gel type material), a flexible wall member 40 and an elongated tubular member 30 that covers the wall member. The tubular member is made of a polymeric foam (spandex) which is less pliable than the gel.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 3-4 and 6-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Prokop in view of Carter.

Application/Control Number: 10/083,979

Page 3

Art Unit: 3764

Prokop discloses in figures 1-2 a therapeutic support pad, substantially as claimed.

However, Prokop does not disclose a cover having at least one elastic strap. Carter teaches in

figure 2A a cover 30 having at least one elastic strap 42. It would have been obvious to one

having ordinary skill in the art at the time that the invention was made that the cover and the

elastic strap as taught by Carter could be used to cover any object including the pad disclosed by

Prokop in order to keep the pad clear before it is used. It is inherent that the pad could be the

diameters and the lengths recited in the claims because neither dimension is critical or provide any

novelty over the prior art.

Allowable Subject Matter

5. Claim 5 is objected to as being dependent upon a rejected base claim, but would be

allowable if rewritten in independent form including all of the limitations of the base claim and any

intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure. No additional prior art was cited during the first office action.
